

My Action Plan

Protect Kids & Strengthen Families

- **Support homeschooling families** - Create a federal tax credit or deduction for qualifying homeschooling expenses.
- **Protect homeschool athletes** - Prevent discrimination against homeschooled students who want to participate in public-school athletics.
- **Support parents caring for disabled children** - Allow parents to be paid as direct caregivers for minor children with intellectual or developmental disabilities when families choose that option.
- **Protect children in publicly funded schools** - Prohibit federal education funds from being used to promote or discuss gender-transition ideology to minors or to purchase or distribute age-inappropriate sexually explicit instructional materials.
- **Protect minors from indecent exposure** - Condition certain federal criminal-justice grants on states adopting enhanced felony penalties for adults who knowingly and intentionally expose themselves to minors.
- **Federal age verification requirements for adult websites**
- **Protect families from toxic contamination** - Strengthen federal law to guarantee faster testing and response for residential radioactive and toxic contamination, expand emergency relocation and independent testing assistance beyond traditional Superfund sites.

Lower Healthcare Costs

- **Fundamentally reform Pharmacy Benefit Managers.**
 - The three largest PBMs control roughly 80% of U.S. prescriptions. Breaking it up would drive growth to smaller independent pharmacies.
 - **End rebate incentives that can favor higher-priced drugs.**
 - **End abusive spread pricing** - where a PBM charges an employer or insurer more for a prescription than it reimburses the pharmacy and keeps the difference.

Energy & Cost of Living

- **Protect energy choice** - Prohibit state and local governments from banning or arbitrarily limiting specific lawful energy resources.
- **Fast-track energy development** - Streamline private-land leasing and permitting for domestic energy and mineral extraction.
- **Rebuild American Industry** - Accelerated permitting for manufacturing facilities, apprenticeships and skilled-trade training, domestic supply chains, and federal procurement rules favoring U.S.-produced goods.
- **Federal gas-tax holidays** - Current federal tax is 18.4¢ per gallon on gasoline and 24.4¢ per gallon on diesel. Temporary suspension with automatic expiration without congressional renewal during major supply disruptions or national emergencies.
- **Data center tax reform** - Ensure massive data-center operations pay their fair share rather than shifting infrastructure and energy costs onto local taxpayers.

Law & Border

- **Zero tolerance for illegal immigration** - Enforce immigration law and strengthen standards governing asylum claims.
- **Reward cooperation with federal law enforcement** - Prioritize federal law-enforcement grants for jurisdictions that cooperate with federal authorities.
- **Create a district-wide fraud task force** - Coordinate federal, state, and local resources to identify and prosecute fraud affecting taxpayers and government programs. Require better cross-agency data matching, identity verification, recovery of improper payments, and routine reporting to Congress.
- **Constitutional Rights First** - Prohibit U.S. courts, public agencies, and legal institutions from applying or enforcing Sharia law or any foreign legal system or rule that conflicts with constitutional rights or applicable federal law.

Second Amendment

- **National concealed-carry reciprocity** - Require states to recognize valid concealed-carry permits issued by other states.

Grassroots Representation

- **Create a dedicated grassroots liaison in my congressional office** - Assign staff specifically to work with grassroots organizations and community advocates so local priorities have a direct line into the congressional office.
